

BRAKE

Electromagnetic brake provides precise control over braking force and are used where fast response times and tension control are essential.

MAIN BRAKE FEATURES

Brake Type:	Normally closed, static brake
Static Torque:	>1.5Nm
Nominal Voltage:	24V
Release Voltage:	<18V
Re Engage Voltage:	>1V
Release time (current rise)	<60ms TYP
Engage time (current decay)	<100ms TYP
Power	7.2W
LeadWire	19/0.15 PTFE
Weight	300g
